

2.23" Monochrome OLED Bonnet

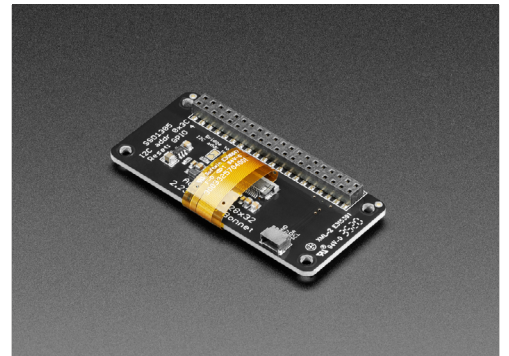

Product Overview

09/14/2022

For the most up-to-date information, visit www.mouser.com or the supplier's website.

Description

Adafruit 2.23" Monochrome Organic LED (OLED) Bonnet is designed to snap onto any Raspberry Pi computer to provide a vivid display. This OLED fits on flat surfaces with an open top to insert the display. The bonnet comes with a 2.13" diagonal monochrome 128x32 OLED with sharp white pixels. No backlight is required as the display makes its own light, reducing the power required to run the OLED. The display features high contrast and is very easy to use. This monochrome OLED works with any Raspberry Pi computer with a 2x20 connector, such as the Pi B+, Pi 2, Pi 3, Pi 4, and Pi zero.

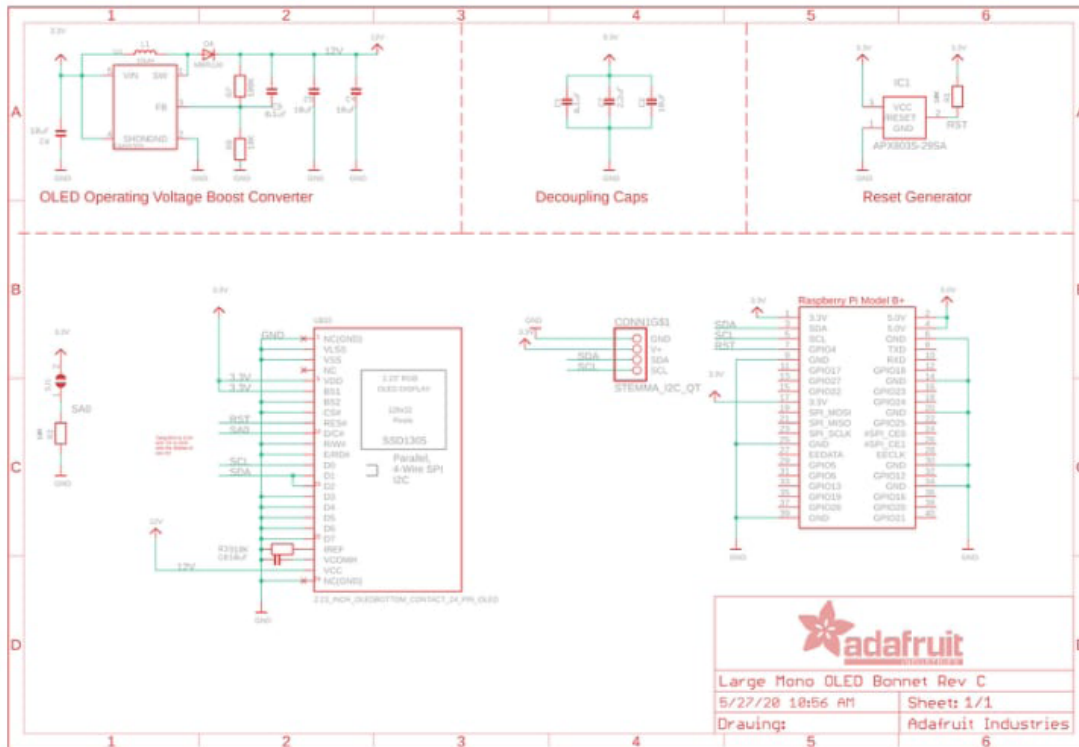

Features

- I²C and GPIO pins
- 2.13" diagonal monochrome 128x32 OLED
- Low power consumption
