Description

Seeed Studio IoT Button for AWS is a Wi-Fi-based cloud programmable dash button that deploys the AWS IoT 1-Click service. This button is used to capture quick customer feedback without burdening customers with time-consuming questionnaires. It is designed for enterprises and developers to easily integrate with existing business workflows and systems using the AWS IoT 1-Click service.

The IoT button features the NCR18650B chargeable Li-ion battery and a stickable bracket. This button can support three types of clicks: single, double, and long press, and 3 LEDs for different indications. Applications include home control, integrate with third-party APIs, one-click to order takeout button, and remote control for Netflix.

Features

- AWS IoT 1-Click service
- Single/Double/Long Press Click Events
- Onboard Power/Event/Wi-Fi Configuration Status LED
- Removable and Chargeable NCR18650B Battery
- Battery Polarity Reversed Protection and Indication
