Description

SparkFun KIT-16403 micro:arcade Kit for micro:bit v2.0 is designed to help users build game consoles. The kit includes the controller:bit carrier board that give access to several pins in the form of buttons laid out in a similar form factor to the classic original Nintendo controller. Inside each micro:arcade kit contains all the components required to build the micro:bit into a full-fledged game system: the only parts not included are two AAA batteries and the micro:bit. The kit does not require any soldering and is recommended for anyone curious about gaming or the micro:bit platform.

Kit Contents

- 1x SparkFun controller:bit (Qwiic)
- 1x arcade joystick
- 1x red concave button
- 1x blue concave button
- 1x yellow concave button
- 1x green concave button
- 1x micro:bit battery holder – 2xAAA (JST-PH)
- 16x spade connector wire (3ft, female)
