

# Pi Zero USB Stem

KIT-14526

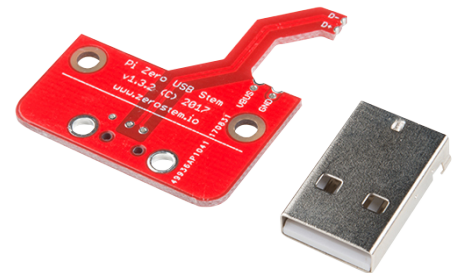

## Product Overview

6/15/2022

For the most up-to-date information, visit [www.mouser.com](http://www.mouser.com) or the supplier's website.

## Description

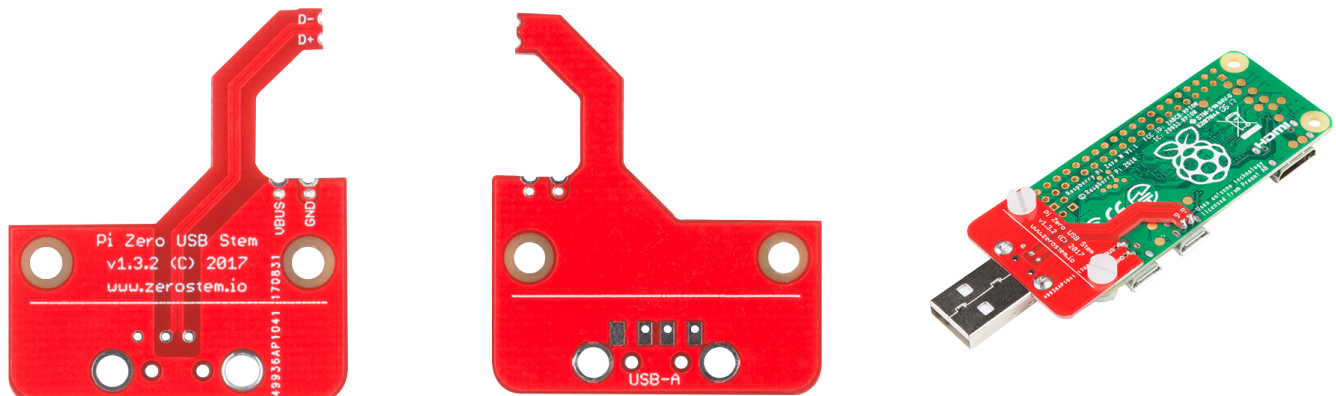

SparkFun Pi Zero USB Stem is a PCB kit that turns a Raspberry Pi Zero into a USB dongle. The pi zero USB comes with a stem, which when installed can be plugged directly into the computer or USB hub without any additional cable or power supplies. The raspberry pi then acts as a USB device using its own Linux kernel gadget drivers to get started. The pi zero stem is designed to be soldered directly to the USB SMD test pads on the bottom of the raspberry pi without any wires or pogo pins. The zero stem is compatible with the raspberry pi zero v1.3 and the raspberry pi zero W v1.1.

## Kit Contents

- Pi zero USB stem
- USB connector
- 2 Nylon bolt
- 2 Nylon screw
