Description

DFRobot FIT0782 R42SR M.2 Key-M PCI-E x4 Extension Cord is designed for LattePanda users and offers PCIe3.0 full-speed stable signal transmission up to 32G/bps. This extension cord supports a high-speed network card, capture card, NVMe SSD hard disk card, USB adapter card, PCI-E x4, and other interfaces. The FIT0782 R42SR M.2 Key-M PCI-E x4 extension cord is manufactured with high-quality material, PCB workmanship precision, and copper that is thickened to 1oz.

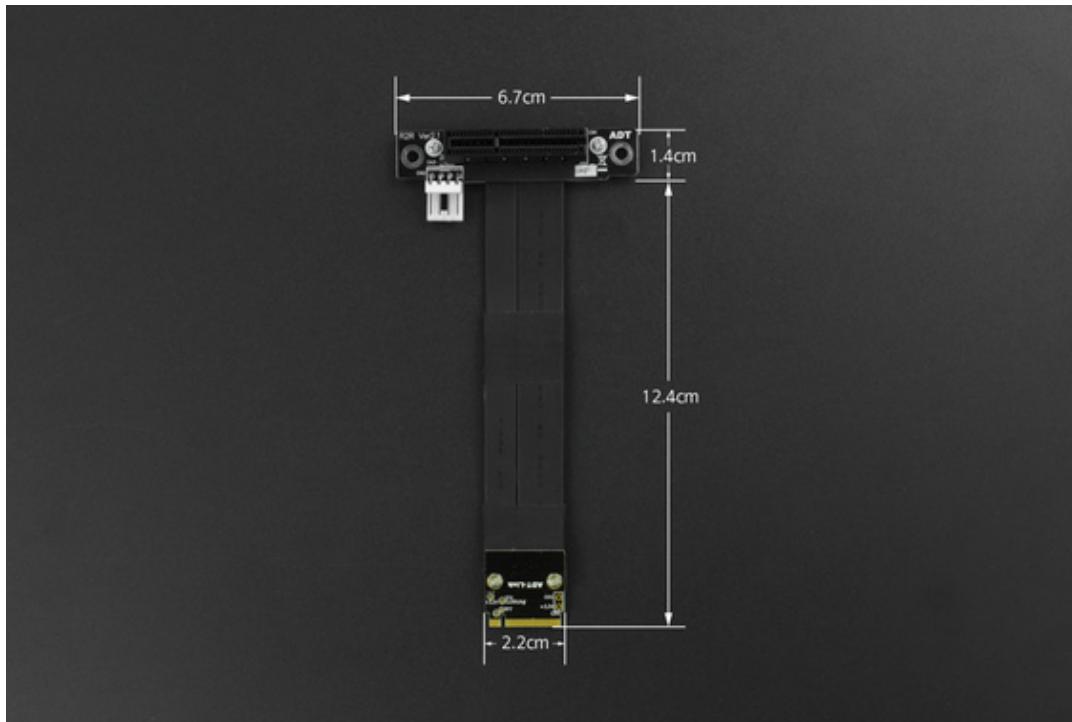

The cord is protected by a PCB gasket with a thickness of 3mm at the metal welding point and is fastened with screws and hex nuts. This extension cord is strong and reliable, resistant to pulling, anti-interference, and not easy to be broken. The cord features sufficient gold content in gold fingers and offers good conductivity that prevents the cable from rusting and reduces blue screen problems. This extension cord is designed to be dwarf and fat to avoid getting stuck on the graphics card. This physical feature of the cord makes it easier to bend, install, and fold without affecting its use, reducing the risk of getting damaged.

Features

- PCI-E adapter board extension cable
- Bandwidth speed:
 - PCIe3.0x4 full speed up to 32G/bps
 - 0.1m/3.94inches length of the cord
