Description

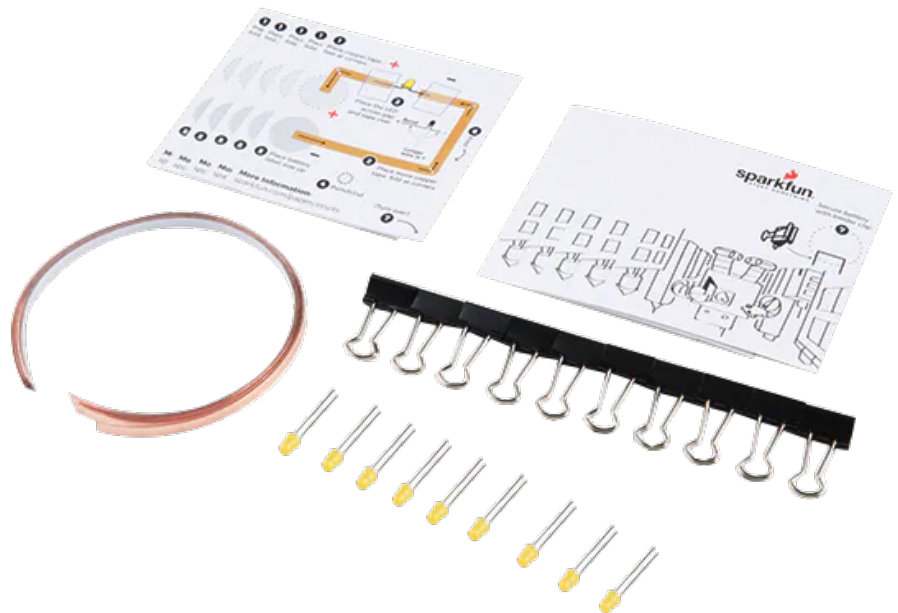

SparkFun KIT-15817 Paper Circuits Kit is designed for creating electronic projects directly on paper using simple components. This kit teaches the fundamentals of creating an electric circuit without the need to solder or code. The Paper Circuits Kit consists of 10 fun and informative light up robot cards, that takes only between 5 to 10 minutes to assemble using the provided templates, strips of copper tape, and LEDs. CR2032 coin cell batteries, scissors, a hole punch, tape, and any coloring supplies are required to get each simple circuit card built.

A paper circuit is a functioning electronic circuit built on a paper surface instead of a PCB. Projects can range from greeting cards, to origami, to traditional art such as paintings or drawings.

Kit Contents

- 10x Printed Robot Template Card
- 10x Yellow LED - 5mm
- 10x Copper Tape - 1ft
- 10x Binder Clip
